

HSINSOU SW-BSRN

Dyeing bath softening and anti-creasing agent

HSINSOU SW-BSRN is a polyester Resin has hydrophilic group. It be used in polyester will improve absorption, and give soft handle for fabrics.

General properties:

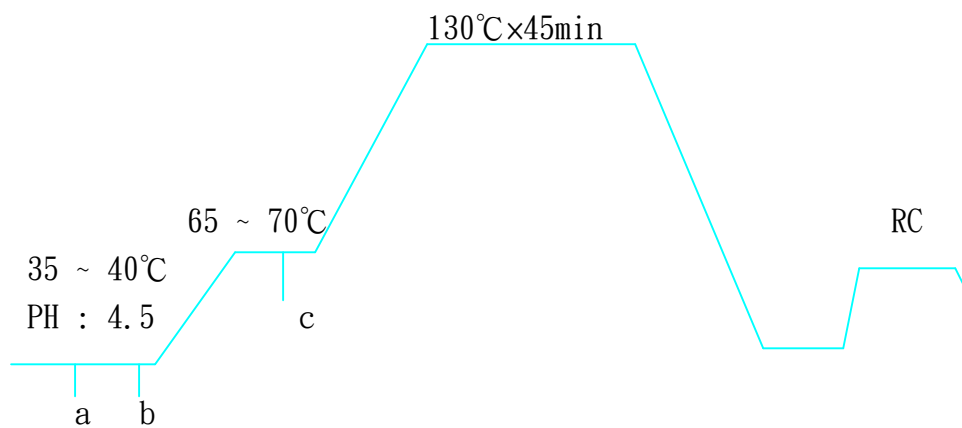

Appearance	:	Brownish liquid
Composition	:	Special ester compound
Ionic nature	:	Nonionic
pH (1% solution)	:	6.5 +/- 1.0
Solubility	:	Easy to dissolve in cold water

Special features:

1. It will improve the hydrophility to polyester fiber.
2. It will improve the smooth and soft handle to fabric.
3. It will reduce the friction of fabric.
4. It will improve the soil resisting and anti-static.

Application:

(A). Polyester dyeing :

a: HSINSOU SW-BSRN	1 ~ 3%(o. w. f)
b: HSINSOU RDT-27	1 g/l
c: disperse dyestuff	

(B). Pad-Dry cure:

HSINSOU SW-BSRN	1 ~ 3% (o. w. f)
