

## HSINSOU TC - 45

### Penetrating agent

HSINSOU TC-45 has a good Permeability for the wet processing of natural and synthetic fabric and it blends, It not only effective for desizing Scouring, bleaching and dyeing but also effective for printing process as a penetrating agent.

#### General properties :

Appearance	:	Yellowish mucus
Composition	:	Special anionic compound
Ionic nature	:	Anionic
pH (1% solution)	:	7 +/- 1.0
Solubility	:	Dissolved in water

#### Special features :

1. Excellent wetting rewetting and penetrating effect.
2. Is useful in after scouring dyeing and prints.
3. The best operation condition pH : 5~10

#### Application :

1. 0.3~1.0g/l HSINSOU TC-45 for fast wetting and

- deaerating in dyeing of packages or cheese.
2. 1 ~ 3g/l HSINSOU TC-45 in padding of direct, dispersed, vat and pigment dyestuff.
  3. Improving the hydrophilic properties of textile material : pad application of 2 ~ 5g/l HSINSOU TC-45.

Note: full evaluation is recommended prior to commercial usage.
