

## HSINSOU NY-131

### Levelling agent for acid dyestuffs

HSINSOU NY-131 is a dyestuffs affinity type levelling agent for acid dyes. It is suitable as levelling agent for dyeing nylon and wool with acid dyes, and it gives the fabrics an even colour yield.

#### General properties:

Appearance	:	Yellow brown liquid
Composition	:	Polyhydroxy alkyl amine compound
pH(1% solution)	:	9 +/- 1
Ionic nature	:	Nonionic
Solubility	:	Easy to dissolve in cold water

#### Special feature:

1. Dyestuffs affinity type levelling agent.
2. Highly penetrating and wetting effect.
3. Give even reproducibility of dyeing.
4. Suitable for nylon dyeing and sulfonated dyes.

#### Application:

Amount of HSINSOU NY-131 required would be depended on the fabrics and the depth of shades.

1. For light shade : 3% o.w.f.
2. For medium shade: 2% o.w.f.
3. For deep shade : 1% o.w.f.

note: full evaluation is recommended prior to commercial usage.
