HSINSOFT PACT Softening agent

HSINSOFT PACT is a weak cationic softener especially designed for application on acrylic fibers and acrylic/cotton blending. It own smooth handle and low yellowing character.

General properties:

Appearance:	White emulsion liquid
Composition:	Special fatty acid compound
Ionic nature:	Weak cationic
Solubility:	Easy to dissolve in cold water

Special features:

1. Excellent softening properties on acrylic and cotton.
2. Can be applied by exhaustion or padding method.
3. Easy diluable
4. Low yellowing

Application:

All working condition depends on process & fiber type.

HSINSOU PACT could be used in padding & exhaustion process.

a. Exhaustion process :

HSINSOU PACT :	5% ~ 7%(o.w.f)
Working temp	: 40°C ~ 60°C
Working time	: 15min ~ 20min

b. Padding process :

HSINSOU PACT :	50 ~ 70g/l (o.w.s)
