

HSINSOU KM-CTC

Raising agent

HSINSOU KM-CTC is a special napping aid for napping of knitted and woven fabrics such as cotton , polyester/cotton.

General properties:

Appearance	:	Yellowish emulsion liquid
Composition	:	Special weak cationic and nonionic surfactant
Ionic nature	:	Nonionic/ weak cationic
pH (1% solution)	:	4.0 +/- 1.0
Solubility	:	Easy to dissolve in cold water

Special feature:

1. HSINSOU KM-CTC: imparts a smooth soft hand
2. HSINSOU KM-CTC: can be applied by padding or exhaustion
3. HSINSOU KM-CTC: suitable for use on cotton polyester / cotton

Application:

HSINSOU KM-CTC can be applied by padding or exhaustion

The dosage: HSINSOU KM-CTC: 2%~4%

Temperature should be 40°C for 15~20 minutes.

* Temp. should not over 40°C

Note: full evaluation is recommended prior to commercial usage.
