

## HSINSOU KM-SPD

### Raising agent

HSINSOU KM-SPD is a raising agent of special component, and is suitable for polyester fabrics. It imparts peculiar smooth and full handle to the raised fabrics.

#### General properties:

Appearance	:	White emulsion liquid
Composition	:	Poly fatty acid ester compound
Ionic nature	:	Nonionic
pH(1%)	:	5.0 + / - 1.0
Solubility	:	Completely soluble in water

#### Special features:

1. Imparts peculiar full, soft and smooth handle.
2. Makes raising easier, but gets excellent raised quality.
3. Most suitable for the raising of polyester fabrics.

#### Application:

Dosages depending on finishing and fabrics constructions.

Could be applied by both padding and exhaustion methods:

#### A. By exhaustion:

HSINSOU KM-SPD : 3 - 6 % (owf)

Temperature : below 40°C  
Time : 15 - 20 min

B. By padding:

HSINSOU KM-SPD : 3 - 6 % (ows)  
Pick up : 70 - 80 %

Note: fully evaluation is recommended prior to commercial usage.
